

OIL WOOD STAIN-[COLOR] Product No. SO 10XX

A wide range solvent based oil wood stain, formulated from a modified binders dispersed in suitable solvent to emphasize teire colouristics effect. Oil wood stain enhances the appearance of naturel wood and protect againts most forms of rot and fungal attack.

USE

Ideally suited for all types of wood cladding, particularly on exterior surfaces.

SPECIFICATIONS

Properties

Color	: Available in 18 different colors. [Pls refer to Oil Stain Color Card]
Specific gravity	: 0.975 – 1.18 Kg/lit [$\pm$ 0.025]
Viscosity 4/25°C	: 150 sec. [$\pm$ 1]
Weight Solids	: 38% Kg/Kg [$\pm$ 1]
Flash point	: 21°C
Theoretical spreading rate	: 12 sq. m./lit [depending on substrate absorption and the dilution %/].
Drying Interval	: at 25°C.
Over spraying	: 20 min. based on the dilution. Drying time depend on the type of application and no guidelines can be provided.

SURFACE PREPARATION

All timber species must be fully aged with a moisture content of less than 15%. Surface must be dry, clean and free from contaminations. Natural oil or gum must be removed by solvent cleaning.

To obtain optimum surface finish sand the wood properly in the same direction of the wood grain, utilize sanding paper No.[120]. For filling perfection of wood grain it is adequate sanding between coats depending on the desired covering effect, and removal of dust.

APPLICATION METHODS

Oil wood stains can be applied by hand-held or on-line spray guns, with running spray guns, roller or by immersion. After spray application the stains can be wiped off also with line running brushes. The amount of thinning depends on the colour required, the type of application, the type of material to be stained (material, shape and size). The choice of thinners depends on the conditions of work, application, the time available and the need to limit the emission of VOC (volatile organic Compound) into the air.

OIL WOOD STAIN-[COLOR] Product No. SO 10XX

PRODUCT PREPARATION

Stir well before use. Thin to the required viscosity ensuring the product is homogeneous.

Dilution

It is advisable and after stirring the product, to dilute the product with Turpentine. The dilution is related to the concentration required of the color on the wood. The dilution varies from 200% to 500% .

NB : It is not suggested to mix this product with NC or PU paint or any other solvent base system

CLEANING & CAUTION

Cleaning

Clean all tools and equipment immediately after use with [TC010] Tool Cleaning.

Caution

Do not use when humidity levels may cause surface condensation (maximum 85%), during rainy conditions or if temperatures are likely to fall below 5°C during application and drying. Protect from frost.

PACKING & STORING

Available in 1 Ltr , 3.5 Ltr .

Store in a cool and well ventilated place. Keep away from direct sunlight. Minimum one year in unopened container, stored in a cool and dry condition at 25°C.

SAFETY & FLAMMABLE

This material is flammable and must not be exposed to naked flames or direct sun light.

Use only in well ventilated areas. In case of insufficient ventilation during application wear suitable respiratory equipment. Do not breathe vapor / spray.

In case of contact with eyes rinse immediately with plenty of sweet water and seek medical advice.

In case of contact with skin, wash immediately with soap and water or a recognized skin cleaner. Keep away from sources of ignition. No Smoking. Keep out of reach of children.
